

Daniel Green (Canada)
Home: Drumheller, AB
Competition Area: Car Painting

Daniel Green is a person who is constantly striving to meet his personal goals. He enjoys a busy life of sports, hobbies, work and spending time with friends and family. When thinking about his career, Daniel wanted something that was hands-on, challenging, interesting and provided future opportunities. After trying a few different things, Daniel found a path that fulfilled the criteria for his ideal career – auto body repair. He believes that searching for a career you enjoy is worth it because eventually you will be rewarded and you will never stop learning.

While attending the Southern Alberta Institute of Technology (SAIT) for a course in Autobody Refinishing, Daniel had teachers and trainers who helped him develop his skills. They taught him innovative techniques and how to use new technology to evolve as a professional. Inspired by professional car painters such as Chip Foose, Daniel uses others' work as his motivation and continually pushes himself to do exceptional work. He is very proud to see the final result of his work and is pleased to know his customer is fully satisfied.

Daniel's first experience with Skills/Compétences Canada - Alberta was in 2007 when he competed for auto body repair. He was then invited to compete again for car painting and took home the gold medal at the Skills/Compétences Canada - Alberta Provincial Competition as well as the gold medal at the Canadian Skills Competition 2008. Competing at 40th WorldSkills Competition in Calgary, in September 2009 will prove to be an experience for Daniel that he will never forget.

"I am eager to see where my skills are ranked, gaining experience, and meeting all the wonderful people from Canada and around the world."

Daniel has recently completed his last year of technical training as well as all of his apprenticeship hours. At his current job, he continues to exhibit discipline, courage, and determination in all of his tasks.
